struggle in dim lighting, although that difficulty is often offset on the Nikon D3100, D5100, or D7000 by the AF-assist lamp, which shoots out a beam of light to help the camera find its focusing target. When you encounter situations that cause an autofocus hang-up, you can try adjusting the autofocus options.

Manually - dummies

All manual focus Nikkors are what we now call FX lenses - they were designed for use with 35mm film, and produce an image circle that will cover the "full frame" sensor of FX DSLRs. Of course, they will also work with Nikon DX cameras, subject to the normal 1.5X "crop factor" that is well-known to DX photographers.
