Handbook of Fish Biology and Fisheries

Fisheries and aquaculture are most commonly thought of as "fish farming"—the theory and practice of cultivating marine and freshwater algae and animals for food.

Fisheries and Aquaculture, B.S. | Florida Tech

The general supply of seafood in the world is shifting more towards aquaculture as the supply from wild catch is stagnating in several regions and for many important species. Wild catch of salmonids varies between 700,000 and 1,000,000 tonnes GWT, whereas farmed salmonids are increasing.
