To get a sense of the research take a look at my discovery series presenting how I learned about studies on various topics, a summary of the science linking trauma as a risk factor for chronic illness, or the adverse childhood experiences (ACEs) post describing the ACEs studies that show increased risk for chronic and autoimmune illness.

How Understanding Trauma is Making Sense of My Chronic ...

Researchers can cope by genetically “engineering” the animals to have a version of the illness, but it is not the same thing. Studies performed in humans can have limitations, too. Take observational studies, which are what they sound like: Give a drug to a group of people and observe the result.

How to make sense of coronavirus studies

Over the past century there has been a radical shift in responses to people who experience mental health problems. In this free course, Making sense of mental health problems, you will learn about how key perspectives in the field have made sense of mental health problems.

Making sense of mental health problems - OpenLearn - Open ...

It turns out that one of the gifts of the three wise men to the baby Jesus, frankincense, would be much for valuable today because the trees from which it comes are disappearing. Frankincense is produced by the Boswellia tree and it's collected as a resin, which oozes from cuts made in the bark like latex from rubber. The tree probably produces the resin to ward off grazing
