Philip Hawley Jr. gets it just right. His characters are believable! They say clever things that are perfectly in keeping with their characters. The book is a mystery, an action book and a medical thriller. It was obvious that the author knows a lot about medicine and biochemistry even before reading his bio at the end.

Philip Hawley, Jr has created a great suspense novel. I would have preferred to give this a 4.5 rating, but only because I felt some of the lesser characters could have been developed a bit more, but felt it deserved more than a 4, since I couldn't put it down for very long.

Stigma by Philip Hawley Jr. is a brilliant medical thriller. The first half of the book is a bit slow but important since Hawley is giving you character history and back story but as soon as you hit the half way mark, the book is on fire. I could not put it down. The Characters are rich, the story detailed. I don't want to give too much away.
